NICOLLET COUNTY NURSERY
ST. PETER, MINNESOTA
1908-1938

this our 30th anniversary year in growing
Nursery stock for sale in black soil of Nicollet county.
42 years ago, I sold my first nursery order
in this community and it has been my pleasure to serve the
same patrons ever since.

45 years ago, I planted my
first 1000 apple grafts.

Again we will haul down to St. Peter &
Mankato loads of general line of nursery stock
and haul same into the cool moist
soil at the Claud Veith Home on the third
block up Broadway from Main Street in St.
Peter; and at the Mankato Hatchery, the
first place west of the Blue Earth river bridge
in Mankato south of pavement 169.

We extend our sincere thanks to
Mrs. John Runcl at the Mankato
Veith at St. Peter Sales Grounds
and select ITCH nursery stock during April
and May at 1006 first.

1938 Guarantee. We agree to replace
any of our nursery stock bought from us or our Sales
that we are basing our new guarantee...

ADVANCED Apple recently named at the
recent State Horticultural Convention and
BEAUCH apple also three other seedlings
described on reverse side under apples.

We are the only nursery to our knowledge
that furnish the BEBE HARDY PRUNE on
their own roots. 30 year old trees still alive, productive, fruit hangs well and of
very best quality. 4-5 ft. 75c. 3 for $2.

quest of nursery stock write.

In behalf of my Family, Mr. & Mrs. Claud
Veith at St. Peter Sales Ground, and Mr. &
Mrs. John Runcl at the Mankato Sales' and we extend our sincere thanks to you that
made this 30th anniversary year possible.
and we will endeavor to merit your continued satisfaction in the years to come.

Yours for better results.

H. J. BRIDGMAN.
SMALL FRUIT

RASPBERRY, Latham. Largest red per 100 3.50
Chief. Hardesty early per 100 3.75
Newburgh. A promising new variety that so far is immune to mosaic and a
thirty, quick to bear, and fair size
berry. 10 for 65¢; per 100 $5.00.

RASPBERRY, Columbus. The best purple of a
non-spreading variety. 10 -$75c; per 50 $2.90

GOOSEBERRY, Carrie. Largest productive, and
and can be stripped off instead of picked
as less thorny. 25¢ each; per 10 $3.10.

CURRENT Perfection and Red Lakes both the
largest red grown. 50¢ each; per 10 $2.75.

GRAPEs, Beta & Alpha, the hardest grown.
2 Yr. Male 25¢ per 10 $2.10. 3 Yr. Male 30¢
GRAPEs, Concord. Large 15¢ per 10 $1.40
GRAPEs, Fredonia. Three weeks earlier, more
productive than Concord and as good eating
25¢ each; per 5 for $1.50. 3 Yr. 40¢ each.

STRAWBERRY, Dunlap. Best June Bearing 1.50
Blackmore new. 1.50
Premier Early. 1.50
Seaver. 1.50
Minnehaha Late. 1.50
Champion, Gen Everbearing 2.25

MUHABEELS Giant Victorian 15¢ per 10 1.20
Muhabeels Ruby. New high in sugar content.
Makes red sauce very tender and hardy. 50¢

ASPARAGUS Mary Washington 3¢ per 100 1.20

APPLIES

From information of the 20-28 years
of testing by the various experiment sta-
tions, I feel sure that the following five
new apples will, in a few years, become as
standard as the Latham Raspberry is in U.S.
to-day.

NO. 1007 - ALDERSON. Recently named at the
State Horticultural Convention in honor of
Prof Alderman head of the Horticultural Div
at the University of Minn. He has this to
say about loo7: "There is no apple in the U.
S. today that has any better quality than this
apple." It is a late winter apple with a
distinct commercial future. Sticks to
tree. 4-5 Ft $1.25 - Only one to each.

No. 423 BEACON. A wonderful red fall apple
equisite quality. Ripens about the same
as Dutchess which it is destined to re-
place according to Prof Alderman. 4-5Ft
$1.35 while they last only one to patron.

No. 760. Late fall wealthy type. Tremendous
bears. Quality splendid, and outstanding
fall apple. Sticks to the tree better than the
wealthy. 4-5 ft. $1.25 each.

No. 790. Large purple colored seedling of the
Monmouth Black Twig. Will keep until
February. Good eating, good dessert apple
and a real baking apple that is certain to
make good. 4-5 Ft. $1.25 each.

No. 638. Large like the Haralson. A late
wealthy type but larger. Is the last apple
to hang to the orchard trees in late autum
Keeps better than the wealthy. 4-5 $1.35.

QUALITY FRUIT THAT HANGS IS OF VALUE)

Anoka. Early bearing fall apple very hardy
Red DELICIOUS. In protected places this is
hardy enough to bear fruit that's real good

Red DUCHESS, N.W. GREENING, WEALTHY, WHIT-
NET, TRANSPARENT, is old reliable apples
that needs no description.

YELLOW TRANSPARENT. The earliest apple
but destined to be replaced by Erickson.

HARALSON. Fastest apple of first degree
of hardness. A good keeper of very good
eating qualities. Branches out wide with
strong shoulders. Size and color like the
Wealthy; but of better keeping qualities.
Originated by Minn Fruit Breeding Farm.

CORTLAND. A new apple of improvement and
similar to McIntosh. Fast grower, bears
the fourth year fruit that adheres firmly.

MALINDA. Heaviest bearing, longest keeping
and hardest winter apple in the north.
No INTOSH. Sept to Jan. Bright deep red
good size and quality. Second hardness.

AURORA. Early Bearing 1.30
DUNLAP. Best June Bearing 1.50
PREMIER. Early Fall 1.50
SEAFORD. Early Fall 1.50
MORRIS. Late Fall 1.50

FRUIT TREE PRICES

Size Each Per 10 4-5 Ft. $.65 5-6 Ft. 1.50
6-8 Ft 7.50

UNDERWOOD plum. Largest early and very
good eating & Sauce. Quick bearer.

WANITA. Prof Hansen's best plum. Immense
size; good keeping qualities. Early Bearer.

La Crescent. Largest yellow plum for Minn.

SUPERIOR. Midseason. Another large yellow
plum with pit freestone. Very productive.

MONITOR. New large anual bearing plum of a
good quality - Red with yellow flesh.

KAGA. An improvement of the apricot flavor
Hansa, being longer lived, heavier bearer
and of good pollinating value.

CHEERY Early Richmond. The only straight
large red cherry for Minn.

CHEERRY. Oma. Very good bearer ever first
year after setting of rich purple red
cherry. Dwarf hardy. 3-4' $1.75 4-5ft. 85¢

CHEERRY. Zumba a good pollinator for the
above heavy producer of dark red fruit.

PEAR Parker. Minn. No. 1 This pear seems to
be one of the few years tried but in Minn.
that is worth while. Very large and hardy

PLUMS

RED DELICIOUS, N.W. GREENING, WEALTHY, WHIT-
NET, TRANSPARENT, is old reliable apples
that needs no description.

PLUMS -

DURKS, H.W. GREEHIHG, WEALTHY, WHIT-
NET, TRANSPARENT, is old reliable apples
that needs no description.

Yellow Transparent, the earliest apple
but destined to be replaced by Erickson.
I remember when I sold my first nursery order 43 years ago. It was to a retired farmer. He wanted a variety of plants, planted in straight rows on each side of the sidewalk, with a flower bed on each side.

His lawn was far too full of shade trees to allow for natural development of size and beauty as they grow older. He was proud of his order for Crimson Ramblers and Cut Leaf Weeping Birch.

Later demands were for Spirea Van Houttei (Bridal Wreath) and it was common to see them alone along the foundation of home after home.

In later years we see a variation in foundation plantings of shrubs with an occasional evergreen or evergreen and shrub planting.

Do not plant trees or shrubs between your main outlook or living room window and a desirable view such as a church spire or a desirable distant view. Undesirable views can be screened out regardless of large trees because such undershrubs as the Tartarian Honeysuckle, the Buckthorn, Cercis, Spirea Van Houttei will grow very easily under trees. We have landscaped the main public institutions and homes in this vicinity in the past 30 years and would be pleased to be of assistance to you.

Write us your problems — no obligations — it our free service to you for better homes.

REMEMBER "Southern cheaider grow stock not cheap, it our aim to be priced cheap."
A WINDBREAK

THAT WILL ADD TO THE COMFORT AND CONTENTMENT OF THE FAMILY AND THE LIVE STOCK IS A VALUABLE ASSET TO ANY FARM

PREPARATION OF THE LAND.

The soil should be prepared and in condition as for a garden. Soil land should be broken two years in advance and cultivation should continue until trees shade all the ground. Grass and weeds will come and crowd the trees.

MULCHING

Do not mulch unless it is absolutely impossible to cultivate. If mulching is necessary, only clean wild hay or straw should be used. Don't use raw manure, as it tends to burn trees if too close.

PROTECTION

Protect your plantation from fire and keep all farm animals out by putting up good fences. Protect your yard and your trees from N.W.-now—drifts by planting a snow fence or catch as shown to the left. The snow trap area make a good calf pasture or alfalfa strip which will have plenty of snow moisture.

CROSS SECTION OF WINDBREAK

Row 1 Caragana and Russian Olive. Low Willow, Wild Plum, Chokecherry or common lilacs.
Row 2 Caragana (Siberian Pea Tree) is the best being drought resistant with roots straight down and upright branches so does not interfere so much with crops or machinery.
Row 3 Canadian, Norway, or N.W. Poplar. Willow, Cottonwood, Chinese Elm—(for high land only)
Row 4 Am. Elm, Green Ash, Maple, Hackberry, Black Cherry, Butternut, or Walnut.
Row 5 Same as row 3.
Row 6 Ponderosa or Yellow Western Pine, Norway Pine, Scotch Pine, or White Pine.
Row 7 Same as row 7.
Row 8 Same as row 7.
Row 9 Colorado Blue Spruce (green ones), Black Hill Spruce, White Spruce, andLastly Norway Spruce.
Row 10 Same as row 9.

VALUE OF ABOVE PLANTING METHOD.

You will note that every other row is soft wooded variety while alternate rows are slower growing hard wooded varieties. A quick growing is short lived. A slower growing is long lived. Thus the quick growing soft woods will give quick results and being shorter lived will leave double space for the hard wooded more valuable trees. Be sure to plant the snow catch as without it, snow will pile up in the main windbreak and break off a branch or even tree when young here and there and there will be openings in the windbreak. For this locality plant row 1 & 2 into Caragana, Row 3 Willow, Row 4 Am. Elm, Row 5 Norway Poplar or Chinese Elm, Row 6 Green Ash, Row 7 & 8 Pine, Row 9 Black Hill Spruce, and Row 10 green Colorado Blue Spruce.

ELECTRICITY FROM THE WIND

You that have large enough windmills and water storage tanks would not go back to gas engines and pay power cost. It takes power to make electricity. Why pay others for that power when in wind you have plenty that you let go by. Tax Free.

For over two years we have had a 2500 Watt Airlite Wind Power that has given us all the electricity out of the wind. We use electric power in manufacturing bee supplies, extracting 1372 gallons honey, lighting & running pumps for our business, motors & lights about the place. This fall we accepted a dealer's contract to handle the 9 sizes Airlight Plants from 6 volts, up to 30 volts, 885 watts. The largest is the largest made. We recently gave factory order for their Light Houses. Write Circular.
EVERGREENS

The last years have taught us what evergreens are dependable in Minnesota. Some in various soils. Some died in the best of soil conditions in protected places, so when selecting evergreens be sure of your soil and variety for final growth.

JUNIPER CANNARTI. A deep green trimmed pyramidal that takes the place of ArborVitae.

PINE, NORWAY. Has such a deep green color of tufted appearance in the distance.

PINE, Dwarf MUGHO. Can be trimmed, root on the corners, untrimmed near the entrance or grouped on corner of front lawn.

SPRUCE Black Hill. Native of the worst land. A most rugged spruce for the northwest unless it be the Green Colorado Blue.

SPRUCE, Colorado Blue. 64% is of green color while 16% is a good average grown that is blue. Come select your Blue spruce.

JUNIPER, Pfitzers. A fantastic dwarf growing evergreen of bluish green color. Very useful for foundation grouping. Juniper ANDORA and Coraunis, different dwarf color except that Savin is more saucershaped and regular in growth with a deeper green shade.

EVERGREEN PRICE

Balled & Burlapped each per 2

ARBOR VITAE, American 3-4 ft $1.50 3.00

SIBERIAN 3-4 ft $1.75 3.50

SHADE TREES

ELM, CHINESE. In light soil and higher places this may prove to be a valuable tree. Its beautiful small leaves does not litter up the place. Quickest growing tree. 2-4 ft $0.50; 4-6 ft $0.50; 6-8 ft. 75¢ each; 8-10 ft $1.75; 10-12 ft $2.25 each.

ELM AMERICAN WHITE. Most dependable tree. One on my Grandmothers homestead takes three men to encircle - How old? Anyway 300 years. It's shadow is 67 feet across. 5-6 ft. $1.50; 10-12 ft. $1.75; 12-16 ft. $2.00 6 ft.

ELM MOLINE. Is larger deeper green leaved 12 to 14 foot $3.75 each.

BIRCH, Cut leaf Weeping. A most stately tree, having white bark and hanging cylon leaves. A beautiful lawn tree. 5-6 ft. $3.25 each. Per 2 $4.40.

CRAB, DOUGLAS. A quick bearing tree with white flowers. Bright red fruit great for jelly. 4-5 ft. $1.00 per 2 $2.00 CRAB, Hops. Reddish leaves - deep pink flowers. Deep red fruit that hang on. 4-5 ft. $1.00 each. Per 2 $1.90.

MAPLE, HARD. Perfect shaped tree. Deeply lobed green leaves turning to yellow and reddish hue in autumn. 5-6 ft. $1.25 each.

MAPLE, SCHWEFLERII. Red leaves in spring turning purplish green in midsummer and golden yellow in autumn. Very attractive. The last years have thought us what every tree and also a long lived tree in any any windbreak that in years to come could be valuable for lumber as well. 5-6 ft. 75¢.

POPLAR, Bolleana. Smooth gray green bark. Maple-like leaves, dark green on top, white beneath. Plant one for sky line effect. 5-6 ft. $1.25 per 2 - $2.50. 6-8 ft. $1.75 per 2 - $3.40.

SHRUBS

HOW TO PLANT SHRUBS FOR EFFECT

Plant along the foundation of the house, the taller at corners, smaller under windows and in the corners of the walk, along the border and so make a cut off living room. Plant in groups of six irregularly, so it appear natural. You can get a very good assortment while prices is reasonable.

BEAUTIFY YOUR HOME.

BARBERY Japan, 4ft. Thunbergii is entirely free from rust. A compact dwarf shrub for foundation planting. Facing shrub ahead of taller varieties. Foliage is fine green in spring changing to red in fall laden with bright red berries that remain through winter when eaten by hungry birds.

BARBERY, Red Leaf. 3ft. This is the red leaved barberry. Is not perfectly hardy.

BUCKTHORN, 15-18'. A thrifty grower. Dark green foliage with black berries. For hedges.

CARAGANA, (Siberian Pea Tree) 10-14'. Gray-green leaves early bright yellow blossoms extremely hardy. Green stem and bark.

NEWPORT, Purple leaf Plum. 5-6'. The dark red leaves makes it a striking contrast.

COTONASTER, Acutifolio. 5-6'. Glossy green Waxy foliage that turns red in autumn.

HONEYSUCKLE, Pink or white tatarian 8-10'. Either color attractive in May followed by red berries which is relished by birds. Is the easiest shrub to grow under trees.

HONEY SUCKLE MARROWTI, 5-6'. Spreading habit. Creamy white flowers followed by red berry

HYDRENGEA Arbor. 4'. "Snow Hill Hydrangea" Large showy white flowers from midsummer on through winter when eaten by hungry birds. All showy varieties for foundation grouping and mass planting.

HIGH HUSH CRANBERRY, 10-12'. An spreading grower that has very showy red berries.

ELDER GOLDEN & CUT LEAF. 10'. Both these are planted for foliage effect and like the Golden Mock Orange should be planted in sunny spot for best coloring of leaves.

LILAC PERSIAN. The slender branches drooping the blossoms makes this small leaved lilac the most planted as does not sucker. LILAC VIRGINALIS. 4-5'. Chlo P. Semi-dwarf red. L. Spith - S. Purple. Ed Leliovite D. White.

MOCK ORANGE, Conoais 9-10'. Large white.

MOCK ORANGE, Dwarf 2-3'. A fragrant white.

MOCK ORANGE, Golden 4'. Yellow leaved in early spring. White flowers.

MOCK ORANGE, Lelioite. 4-5'. Semi-dwarf with dense racemes of fragrant white flowers.

MOCK ORANGE, Virgalanis. 7-8'. Loaded down with fragrant double white flowers.

SNOW BERRY or Coral busy, Both nearly of the same foliage and 4-5 foot. FORMER is white and the later has red berries.

SPREHA ANTHONY WATHEK. and PEONILLA, 2'. Perennial with yellow double blossom from June until fall.

LAVANA, (Weeping tree) 10-12'. Lilac in appearance & bloom after lilacs are done. Large white bloom during our drought.

RUSSIAN OLIVE. 10-18'. A grey green foliage. Splendid for a back ground.

SPREHA AGBUTA. 4-5'. (Snow of Garland). Small light green leaves covered with loads of white flowers in April & May.

SPREHA BILLARDIA. 5'. Bright pink spikes of fussy pink bloom in July - September.

SPREHA Van Houttei. 6'. Commonly called Bridal Wreath. The most popular shrub loaded with snow white bloom. Planted for foundation grouping and mass planting.

TAMERIX. Amersenis. 8'. A beautiful shrub with lace like foliage. Clusters of pink flowers. Becoming a popular shrub.

PLANT a May FLOWER, Pink, 2-3' 40'; or Lilac - 40' a early peonie "Rubra 0", 50
10 FACTS WORTH KNOWING

1. We have no agents. One of the highest items in overhead expenses in the nursery business that goes to make the price.

2. Most our NC Nursery stock is fresh dug in the spring and healed into the moist cool soil. Our experience has proved that this is the best method of keeping stock dormant and in best possible planting condition.

3. Most our NC Nursery stock is grown on black virgin soil giving us sturdier stock.

4. We have a general line of nursery stock with fairly wide range of varieties.

5. There is no nursery regardless of size that grows every item and size they sell.

6. We grow most of ours. We have the privilege of selecting the stock we are forced to buy or exchange for of the local nurseries in which case our experience in selecting good stock assures you of the highest grade nursery stock.

7. Sold nursery stock for 20 years. Grown NC Stock for 20 years.

8. You can only buy NC Nursery stock at our nursery, or at our NC Nursery Sales grounds in St. Peter on 4th block up on Broadway from the Minnesota River bridge, or at the West Mankato Hatchery the first place west of the Blue Earth River bridge in Mankato and first place south of the pavement No. 169 or Wil No. 5.

9. In planting, your tree will grow with less watering if you soak the subsoil by filling the hole level full of water and let soak in before planting the tree.

10. Our Nursery is 10½ miles NW of St. Pete.
CHECK UP YOUR NEEDED TREES AND SHRUBS RIGHT NOW

BE AN EARLY BIRD

DON'T DELAY

IF YOU DO YOU'LL FORGET AND IT WILL BE TOO LATE
